A PERSONAL TEACHER. A LIMITLESS STARTING POINT.

The university of everything.

An education that comes alive around you - until you can bring it to life yourself.

Every ambition deserves a way forward.

An examination. A working language. A profession. A specialist device. A new direction. EveryVersity begins with what you want to be able to do, then connects the teaching and practice around that goal.

Your education, around you.
Your starting point, preferred language, pace and purpose guide the next useful step.

Ask. See. Discuss. Try.
Conversation, visual explanation and practical challenges bring knowledge into use.

Every subject. Every skill. Every level. Every language.

HOW THE TEACHING COMES TOGETHER

One conversation. A coordinated teaching system.

01 **Your ambition.** A goal, a language, a starting point and time that fits your life.

02 **Relevant foundations.** Subject standards, approved references and learner memory provide context.

03 **Teaching in the moment.** Specialised AI engines create explanations, illustrations, video, simulations and exercises.

04 **Purposeful practice.** Try a scenario, explain a decision and solve a changed problem with less help.

05 **The next useful step.** Reasoning, recurring mistakes and later recall shape the pace and revision.

Understand it. Remember it. Put it to work.

Understanding
Explain the reasoning in your own words.

Practical capability
Apply the idea in an unfamiliar situation.

Retention
Recall the knowledge when the original explanation is no longer in front of you.

Goal achievement
Connect demonstrated capability to the ambition that started the learning.

One answer is a beginning. Evidence gathered over time shows what a learner can do.

THE EVERYVERSITY DIFFERENCE

A whole education. Around one person.

01 Created in the moment
Teaching materials respond to the goal and the conversation.

02 A personal AI faculty
Tutors, mentors, coaches and examiners work around the learner.

03 Goal first
Connect academic, professional and personal ambitions.

04 The right format
Move between discussion, visuals, video and simulations.

05 Visible understanding
Explanations and changed problems reveal the reasoning.

06 Recall over time
Spaced practice revisits what should remain usable.

07 Language and context
Use relevant terminology, local context and standards.

08 Keep moving
Learn new tools and emerging disciplines as needs change.

09 Affordable time
An entry package of 20 learning hours for $20.

10 Several ways to fund access
Individuals, employers, institutions, governments and sponsors.

Learning hours	Package price	Effective hour
20	$20	$1.00
100	$90	$0.90
200	$170	$0.85

Listed pricing is in USD. The website offers six guided demonstrations and takes no payment. Purchase terms and feature allowances accompany commercial access.
